

# Posture Advisor Agent Core

## Product Information

Ontinue's Posture Advisor Agent is designed to discover and prioritize new configuration, policy or feature settings within the various Microsoft Defender XDR products enhanced by practical global security operations expert knowledge and both Microsoft and Ontinue's best practices.

- Its purpose is to enable faster decisions on positive Cyber resiliency impact of the ever-changing business specific environment and new Microsoft Defender and Azure platform innovations.
- It helps our customers to continuously advance their Microsoft security program and enhance their security posture, with tailored cyber advice in real-time.

More precisely, the Posture Advisor (Core):

- Runs as a native Security Copilot Agent in the standalone experience
- Uses the Microsoft Graph to retrieve Conditional Access Policies from Entra ID.
- Reviews active policies against Ontinue's curated knowledge base (based on Microsoft's best practices, industry articles, Ontinue's Security Posture Improvement (SPI) program and Cyber Advisers' experience).
- Produces a report with both prioritized missing policies and completed ones, emphasizing the impact on customer's cyber security posture in a simple and trustable manner (e.g. including links to references).
- The report can be downloaded as an Excel file (or Word)

The agent can be triggered manually by a Security Copilot user as needed, and/or by a scheduled timer weekly. The "Core" edition is a free offering.
