

Ontinue ION MXDR

Modern security needs to be faster, more proactive, and more efficient—without adding complexity.

The threat landscape faced by cybersecurity teams continues to evolve rapidly—and the tools designed to protect against those threats have exploded in number and complexity. Modern cybersecurity tools offer incredible power and innovation, but they aren't solutions by themselves. Purchasing a new tool is the easy part of the solution: the hard part is operationalizing that tool and fitting it into organizational workflows to make the most of its capabilities.

The problem is compounded by the lack of cybersecurity personnel. As the number of tools and alerts increases, the cybersecurity talent gap remains as wide as ever. Finding and retaining sufficient talent to manage the growing number of alerts these tools generate is a continuing problem that keeps CISOs awake at night. As organizations struggle to handle a growing workload, teams are recognizing that more tools and more people aren't the answer. Even large teams armed with the most advanced

Your outcomes with Ontinue ION

Accelerate security program maturity:

Improve the efficacy and scalability of your security program by continually applying lessons learned to adapt and change for the future to increase efficacy.

Detect and respond fast—really fast:

AI-driven automation and real-time collaboration eliminates noise, focuses efforts, and helps respond to threats without negatively impacting business operations.

Operationalize your Microsoft Investment:

Let the 2022 Microsoft MSSP of the Year optimize your Microsoft Sentinel spending while expanding your detection capabilities with our verified Microsoft MXDR solution.

Apply a SecOps Force Multiplier:

The ION Cyber Defense Center brings together security experts, PhD data scientists, and software developers to execute, measure and optimize security operations.

tools are still suffering from burnout. Today, CISOs are among the most overworked and shortest-tenured C-level positions. They're looking for a scalable solution that can provide faster, more effective protection while reducing the complexity in their environment.

Delivering Nonstop SecOps

Ontinue ION is an MXDR service built to make security teams faster, more proactive, and more efficient. The ION service brings together the ION cloud-native platform and the ION Cyber Defense Center, our globally distributed security operation.

Unrivaled Expertise, Microsoft Endorsed

As the winner of the Microsoft Security MSSP of the Year, a 5-time Gold Partner and one of the earliest members of the Microsoft Intelligent Security Association (MISA), we know Microsoft security better than anyone. Ontinue ION and our add-on services are purpose-built for the Microsoft Security ecosystem, and we've been recognized as a verified Microsoft MXDR solution provider.

A new operating model for SecOps

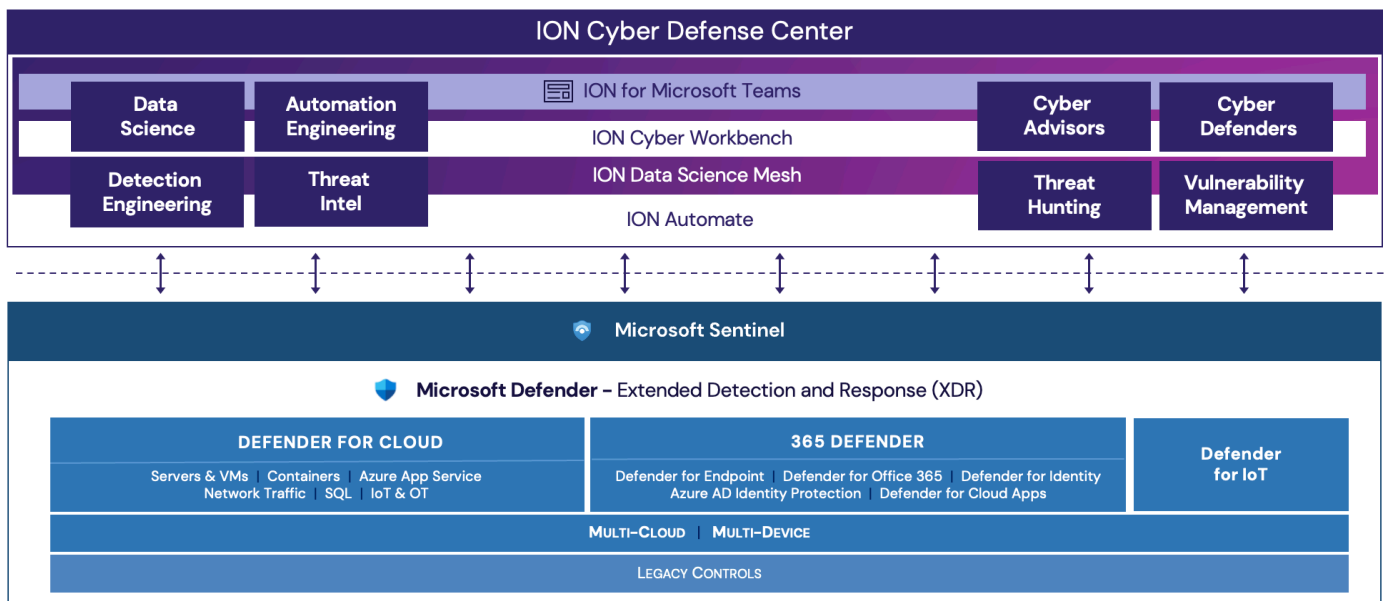

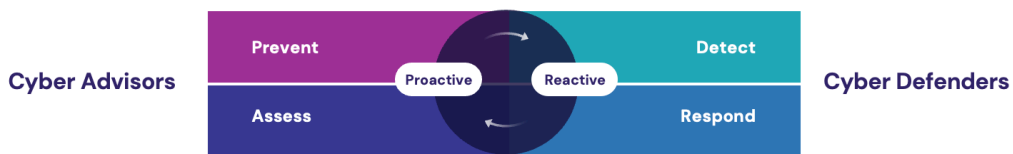

Ontinue ION combines the following capabilities to respond to attacks fast and continuously reduce risk.

- **Automation:** ION Automate leverages a data science team and AI-driven automation to accelerate numerous security operation tasks, from triage to resolution.
- **Collaboration:** The right people have access to the right information in real time, thanks to ION for Microsoft Teams.
- **Localization:** ION brings a tailored, risk-based approach to cybersecurity, understanding your environment, operations, and teams at a fundamental level.
- **Specialization:** No one knows Microsoft like we do. Ontinue ION is purpose-built to get the most out of the Microsoft ecosystem.
- **Prevention:** Designated advisors proactively improve your security posture through continuous assessment or review of incident history, environment, posture and risk profile to guide prevention activities.

Ontinue ION is the MXDR service of choice for Microsoft security customers that want to accelerate MTTR, proactively reduce risk and reduce costs.

Ontinue ION helps you:

- **Get Faster:** 70% of high-severity incidents resolved automatically
- **Get Stronger:** Improve your security score by up to 53% in a single day
- **Do More with Less:** Save 2 days of your analysts' effort per week
