

Manage Ongoing Data Costs for Maximum Cost Efficiency

Modern security programs track a staggering amount of data — from endpoints, servers, IoT devices and more — and CISOs must balance the cost of security programs with the need to minimize risk and vulnerability. For organizations who choose to standardize on the Microsoft security product portfolio, Microsoft Sentinel costs are at the center of this balancing act.

Ontinue Can Save Organizations as Much as **50%** on Data Costs

Ontinue SecOps Cost Optimization capabilities enable customers to predict, optimize, and manage their Microsoft Sentinel spend without compromising security. Built into the Ontinue ION MXDR service, Ontinue's cost optimization capabilities include:

Ontinue SecOps Cost Optimization Calculator:

Ontinue's proprietary tool that projects Microsoft Sentinel costs optimized for security and value, based on each customer's environment and our log ingestion best practices.

Ontinue ION Cost Management for Microsoft Sentinel:

A combination of automated dashboards and human expertise that enables regular monitoring and tuning of Microsoft Sentinel ingestion for maximum cost efficiency, delivered as a part of Ontinue ION MXDR.

Ontinue Cost Anomaly Detection:

Active monitoring and alerting on deviations in Microsoft Sentinel costs based on user-defined thresholds so organizations can respond to data spikes before they turn into unexpected bills at the end of the month.

Your outcomes with Ontinue SecOps Cost Optimization

Save ~50% per year on average without compromising security

Maximize SecOps cost efficiency with Ontinue ION MXDR by optimizing your Microsoft Sentinel data ingestion strategy

Adopt Microsoft Sentinel with confidence

Whether you are considering adopting Microsoft Sentinel for the first time or you are a long-time Sentinel user, Ontinue will help you predict, optimize, and manage your Sentinel costs

Optimize Data Ingestion in 3 Steps:

1

Optimize: Our security experts provide an optimized estimate of your projected Sentinel costs based on your environment and our best practices.

2

Monitor: Gain continuous visibility into Sentinel cost and data usage including automated alerts of data ingestion spikes, allowing you to address changes in cost over time.

3

Manage: Adjust your data ingestion strategy as needed, and your Cyber Advisor regularly provides tuning and optimization recommendations.
