

Nonstop SecOps

Let's reimagine the meaning of nonstop, with AI-powered MXDR.

As a leading provider of AI-powered managed extended detection and response (MXDR) services, Ontinue is on a mission to be the most trusted, 24/7, always-on security partner that empowers customers to embrace the future by using AI to operate more strategically at scale and with less risk.

Successful security outcomes are driven by not only deep security expertise, but a deep understanding of the environments that we protect. We believe that the combination of AI and human expertise is essential for delivering effective managed security that is tailored to a customer's unique environment, operational constraints, and risks.

Our MXDR service combines powerful proprietary AI with a one-of-a-kind collaboration model to continuously build a deep understanding of our customers' environments, informing how we prevent, detect, and respond to threats. Our unrivaled Microsoft expertise allows customers to achieve these outcomes with their Microsoft Security Investment.

The result is highly localized managed protection that empowers security teams to be faster, smarter, and more cost efficient than ever before.

Continuous protection. AI-Powered Nonstop SecOps. That's Ontinue.

8 Offices Worldwide

Protecting 350k+ Users

100% Focused on Microsoft

200+ Employees Across the Globe

Global SOCs Providing 24/7 Nonstop SecOps

4.6/5 Gartner Peer Insights

Your ROI with Ontinue

Accelerate detection and response

70% of high-severity threats resolved automatically.

Optimize daily SecOps

2 days of your security analyst's time saved per week.

Maximize SecOps cost efficiencies

Reduce up to 50% of SecOps data costs with Microsoft Sentinel cost optimization.

Beyond MDR. Ontinue ION changes the game.

Our team of data scientists, security experts, and Microsoft specialists set out to reimagine MDR through the lens of AI. Ontinue ION is AI-powered MXDR that accelerates mean time to resolve and lower security total cost of ownership while driving smarter proactive prevention for Microsoft Security customers. Ontinue ION radically changes the game in three ways:

- **AI-Powered SecOps:** Ontinue ION is powered by ION IQ, our proprietary security AI. ION IQ localizes our managed protection to you by building a deep understanding of your environment, operational realities, as well as the behavior of cyber defenders. The result is tailored protection that reduces your MTTR and reduces the burden on your team.
- **Seamless Collaboration:** We make collaboration easy using Microsoft Teams. ION streamlines real-time communication during incident investigation and response. We simplify decision-making with easy access to critical information and the ability to generate tailored insights with our AI-powered ION IQ Assistant.
- **Unrivaled Microsoft Expertise:** We are hyper-focused on Microsoft. Not only that, but we are a recognized MXDR provider for Microsoft Security customers. Why? ION enables customers to lower their security TCO by leveraging their Microsoft Security investments to consolidate controls and reduce data costs.

Recognized MXDR provider for Microsoft Security customers
