Security Strategy Review

Comprehensive No-Cost Security Roadmap Development Focusing on Security Tool Consolidation for Maximum ROI

The Ontinue Security Strategy Review consulting service evaluates and documents operational security challenges in your organization, identifies opportunities for improvement and creates an actionable roadmap to move you forward. As part of a regular review process, we evaluate your existing security portfolio, identifying both risks created by gaps in your coverage and unnecessary expense caused by redundancies.

With an understanding of your current team size, existing control stack, project task load, and vision for the future, we pinpoint where you can save costs by consolidating tools, and creating a single comprehensive and actionable roadmap, including timelines of when certain products and features should be adopted.

Simplify your security operations

Understand how Microsoft Security can help you simplify the security operations of your organization, minimize the panes of glass you currently use, and free your team to focus on more pressing matters. And the best part is that in many cases, you can retire costly legacy controls with tools you're already paying for as part of your Microsoft licensing, which is why an ROI Calculation is a key component of the review process.

This engagement is provided at no cost to eligible clients.

Intended Audience

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Engage Ontinue Consulting

Strategy Review Focus Areas

ROI Calculation

- Understand the cost of your current security tools and better understand Microsoft licensing and product replacement
- Create a deployment based on your environment and goals
- Develop joint plans and next steps

Microsoft Security vs. Current Tools

- Product vs. product coverage
- Microsoft product connections to other parts of XDR
- Understand features, gaps, and replacement advantages by showing how Microsoft Security products can help

IoT and OT (if applicable)

- Discover threats and vulnerabilities in your IoT and OT environments
- Learn how to prioritize and mitigate potential threats
- Learn the capabilities and benefits of Microsoft Defender for IoT

Roadmap

The review culminates with a comprehensive, actionable security strategy based on current team size, with renewal dates of current products taken into account
