# Ontinue Consulting

Microsoft Security Expertise, from Design to Delivery to Day-to-Day

## Microsoft Security Tailored to Your Organization

Modern security demands comprehensive solutions—and consolidating on a unified toolset often produces security that's more effective than the sum of its parts. Many organizations are turning to Microsoft Security for this very reason. The strategy is proven, but the execution can be complicated.

With Microsoft Security, you can realize significant cost savings—up to 60% savings over a typical multi-vendor solution—and reduce operational overhead without sacrificing security. But does your team have the time and expertise to deploy all of those tools quickly and effectively? Do they have the experience to configure them for optimal coverage? Do they have the experience to operationalize them to retire legacy controls safely and effectively and speed time-to-value?

That's where Ontinue Consulting comes in.

## Holistic Guidance and Support

Ontinue Consulting offers you end-to-end Microsoft Security expertise. From strategy and design, to implementation and deployment, to enablement and tuning, our consultants bring value across the entire lifecycle. Wherever you are on your Microsoft journey, Ontinue Consulting can help.

## How We Help Our Customers

### Microsoft Security Strategy

For organizations considering or just beginning the process of consolidating onto Microsoft's security solutions but aren't sure where to start, Ontinue Consulting can help. The Ontinue Consulting team of experts will help you evaluate your environment and compare your existing tools against the Microsoft products for both security, ROI, and TCO. We use this information to help define your goals and create an actionable roadmap to get you up and running quickly. Our team is also available to provide hands-on support as needed to deploy and tune your Microsoft Security tools.

## Put Our Consultants' Expertise to Work for You

Hundreds of combined years of security and IT experience

Microsoft MVPs in Security

Global team with coverage in Europe, Asia and North America

Extensive Microsoft Certifications including:

- Cybersecurity Architect Expert (SC-100)
- Security Operations Analyst Associate (SC-200)
- Azure Security Engineer Associate (AZ-500)
- Identity and Access Administrator Associate (SC-300)
- Information Protection Administrator Associate (SC-400)
- Azure Network Engineer Associate (AZ-700)

### Microsoft Security Deployment

For customers who've already begun their Microsoft Security adoption journey but need help deploying and configuring specific tools quickly, Ontinue Consulting's delivery team can help. From full deployment of Microsoft Sentinel and adding custom connectors, to full deployment of Microsoft Defender for Endpoint and expanding the deployment to new workstations or servers, our experienced consultants will ensure you're getting the most out of your Microsoft tools.

### Microsoft Security Enrichment

For existing Ontinue customers looking to extend their Microsoft capabilities, Ontinue Consulting's enrichment services provide guidance to organizations that want to expand their tools, add additional devices to existing services, or deploy more advanced SOAR capabilities and customize Sentinel. We even help customers consolidate more of their environment on Microsoft Security. In every case, our years of experience and broad Microsoft expertise allow us to tailor your security tools to your organization's needs.

# Where are you on your Microsoft Security Journey?

## Strategy

We evaluate your existing toolset, examining ROI and TCO along with security. We demonstrate technical value and efficiencies available with Microsoft [Security](#), and create a roadmap to get there.

## Deployment

Rapid expert deployment and configuration of new Microsoft Defender or Sentinel instances, expansion to new devices, or addition of new services, including displacement of existing tools.

## Enrichment

Configure and tune existing services, consolidate more tools under the Microsoft stack, expand devices, and continually harden your environment and strengthen your security posture.

## About Ontinue Consulting

Ontinue Consulting brings end-to-end Microsoft Security expertise, from strategy and design, to implementation and deployment, to enablement and tuning. Our consultants deliver value, reduce operational burden, and harden security across the entire security lifecycle.

Our global team has local experts in North America, Europe, and Asia, with hundreds of combined years of experience, multiple Microsoft MVPs in Security, and countless successful engagements under their belts. Whether you're just embarking on your Microsoft Security journey or you need expert assistance fine-tuning your existing tools, Ontinue Consulting can operationalize Microsoft Security for your organization.
